DETAILED ACTION

*** This office action is in response to filing of the application on October 14, 2003.

Drawing Objection

1. Each of Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. The objection to the drawings will not be held in abeyance.

Election/Restriction

2. During a telephone conversation with Mr. Ronald Coslick on September 15, 2004, a provisional election was made without traverse to prosecute the invention of method claim 1-20.

Product claims 21-26 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Examiner's Amendment

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

4. This application is in condition for allowance except for the presence of product claims 21-26, non elected invention, without traverse. Accordingly,

IN THE CLAIMS:

** Claims 21-26 have been canceled.

Art Unit: 2822

Allowable Subject Matter

5. Claims 1-20 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter:

The references of record including Park (6,303,450), Yeo (6,492,216), Yu (6,689,671), Fitzgerald (6,555,839), etc., alone or in combination, do not anticipatively disclose each and every aspect of the claimed method for fabricating a metal-oxide semiconductor field effect transistor, or fairly make a prima facie obvious case of the claimed method, in combination with other processing claimed limitations as recited in base claim, the inclusion of providing a layer of strained silicon grown on a layer of silicon germanium, and shallow trench isolations defining active regions; implanting carbon into the strained silicon; and forming a MOSFET that incorporates the silicon implanted strained silicon layer in the active region.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael M. Trinh whose telephone number is (571) 272-1847. The examiner can normally be reached on M-F: 8:30 Am to 5:00 Pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on (571) 272-1852. The fax phone numbers for the organization where this application proceeding is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
